Brigham and Women's Hospital

Vascular expert explains cholesterol research that used gene-editing tool

Jorge Plutzky, MD, director of the vascular disease prevention program, and director of preventive Cardiology, is a steering committee member and co-author of SELECT, a landmark clinical trial published in The New England Journal of Medicine, which showed that the weight-loss drug Ozempic decreased heart attacks in patients with obesity and high cardiovascular risk, but not patients with diabetes. [Read more](#) at WCVB-TV.

New gene editing treatment cuts dangerous cholesterol in small study

Michelle O'Donoghue, MD, MPH, the McGillicuddy-Logue Distinguished Chair in Cardiology, also spoke about this research finding with The New York Times, saying that there is a lot of interest in gene editing, as it has the potential to be "one and done — a single treatment and a lifetime response." [Read more](#) in the New York Times

Brigham Bulletin

The Brigham Bulletin is Brigham and Women's Hospital's weekly print and online news publication, written for and about the Brigham's 17,000+ employees and highlighting stories from the hospital's mission areas of patient care, research, education and community outreach.
